SKLegal product wireframe deck

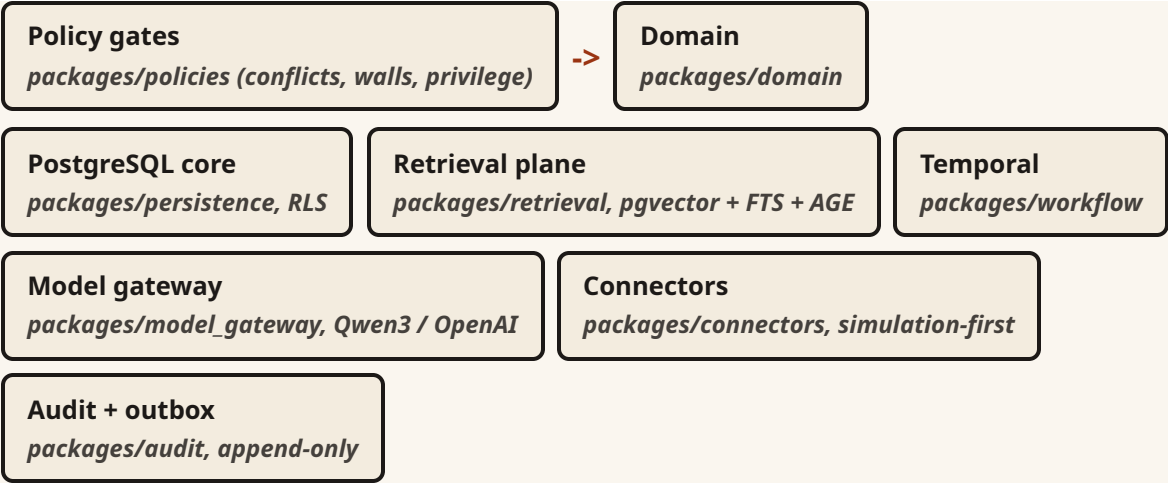

Card SKL-UI-02 (35db7563). Owner directive 2026-08-22. Synthetic content only. Lo-fi layout contract for every approved screen. Each screen header cites the owning board card, the route capability from `apps/web/src/auth/authorization.ts`, and the backend surface it binds to.

Sitemap (routes already registered in `apps/web/src/router.tsx`)

ROUTE	SCREEN	OWNING CARD	BUILD STATE
<code>/sign-in</code>	Sign-in	SKL-S4-01	built
<code>/</code>	Home	SKL-S4-01	built
<code>/clients,</code> <code>/clients/\$id</code>	Clients	SKL-S4-01 / S4-02	built
<code>/matters,</code> <code>/matters/\$id</code>	Matter workspace	SKL-S4-02	in progress (e5ff5976)
<code>/calendar</code>	Calendar and deadlines	SKL-S4-05	placeholder, backend done
<code>/work-queue</code>	Tasks and action queue	SKL-S4-05 / S4-06	placeholder
<code>/corpus</code>	Research, claim ledger, sources	SKL-S4-03	open (f31e9c1e)
<code>/agent-runs</code>	Governed model runs	SKL-S3-02 / S3-03	open
<code>/approvals</code>	Human approval inbox	SKL-S1-04A / S4-06	open
<code>/administration</code>	Policy, walls, connectors	SKL-S1-04A / S2-06	open

System data flow (approved architecture)

Every mutation emits run-ID-correlated audit events. Models return typed proposals only; they never mutate workflow state. External actions follow the approved six-state machine: draft, validated, approved, queued, dispatched, receipt_verified.

/sign-in

Owner **SKL-S4-01** (done) - Capability: none (pre-auth) - Backend: **services/api auth session + CapAuth principal resolution**

S2-04

GOVERNED SEARCH BAR (EXACT-FIRST, THEN SEMANTIC)

Search

Scope chips:

this matter

tenant corpus

official sources

S2-04

RESULT LIST WITH RETRIEVAL TRACE

AUTHORITY / SOURCE	RANK PATH	RELEASE	TRACE
IL Lemon Law 815 ILCS 380	exact-cite	R-006	tr-221
GPO Style Manual (official)	pgvector gen-3	S6-cand	tr-224

Every result identifies tenant/matter scope, release, source hashes, projection generation, query-template ID, and watermark (S2-10 contract).

S4-03

SOURCE-SPAN VIEWER (EXACT QUOTATION)

Highlighted span, exact locator, source hash, supersession status. Inaccessible sources render a denial state, never a leak.

authority superseded? check

jurisdiction: IL

S3-05

CLAIM LEDGER FOR THIS MATTER

CLAIM	SUPPORT	COUNTER-SUPPORT	BLIND CHALLENGE	GATE
Vehicle qualifies as lemon	3 spans	1 span	passed	CLAIM_READY
Timely notice given	1 span	0	unresolved defect	blocked

Similarity alone never qualifies authority. Failed gates cannot be waived by model output.

/matters/\$matterId - tab: Documents (drafting and redlines)

Owner SKL-S4-04 (open, 2e5462d8) - Capability: matterDetail + workproduct.write - API: work product service (packages/domain + persistence), DOCX export worker (Temporal)

- Overview
- Parties
- Timeline

- Deadlines
- Audit

S4-04

WORK PRODUCT LIST (VERSIONED, HASH-PINNED)

DOCUMENT	VERSION	APPROVAL	GATE
Demand letter	v3	Pending approval	DRAFT_READY
Complaint draft	v1	draft	claims incomplete

New draft from template (claim-grounded)

S4-04

EDITOR WITH BRACKETED UNKNOWN

"...on
[PURCHASE DATE - unresolved tension]
the vehicle..." Every factual sentence links to its claim ledger entry. Unknowns block DRAFT_READY.

S4-04

VERSION COMPARE AND DOCX TRACKED CHANGES

v2 to v3 diff preview; export produces genuine DOCX tracked changes, not flat text.

- Export DOCX (tracked)
- Preview PDF
- Approve exact hash

Any edit after approval invalidates the approval and forces re-validation.

/calendar

APPROVAL INBOX (EXACT-VERSION, SEPARATION OF DUTIES)

ITEM	TYPE	VERSION / HASH	REQUESTED BY	ACTION
Demand letter v3	work product release	sha256:44aa...	agent run-991	Review
Email to client	external action	act-2231 v1	Casey	Review
Conflict waiver	policy decision	dec-0091	intake flow	Review

DECISION RECORD PREVIEW

Every approval or rejection is attributable, idempotent, effective-time bounded, and immediately revocable. Superseded authority fails closed at effect time.

/work-queue - external action detail

Owner **SKL-S4-06 A-F + S4-08** - Capability: action.approve - Architecture: **docs/architecture/EXTERNAL-ACTION-STATE-MACHINE.md**

ACTION: EMAIL TO CLIENT - ACT-2231

Failure, cancel, and retry edges documented per S4-08. Temporal owns dispatch orchestration (S4-07); the outbox never initiates provider calls.

S4-06A

DESTINATION VERIFICATION

verified

Exact destination pinned at approval; mismatch blocks dispatch.

S1-03

CAPABILITY CHECK

scoped capability valid

Short TTL, one-use at dispatch, revocation checked at effect time.

S4-06B

RECEIPT AND RECONCILIATION

simulation mode

Connector stays simulation-only until individually qualified and activated (S5-03).

IMMUTABLE AUDIT STRIP

Every transition is an append-only event with run ID, capability ID, and policy decision ID.

/administration

Owner SKL-S1-04A + S2-06 - Capability: administration - API: policy admin APIs (bb103650) + connector registry (b5b771be)
